A great all-rounder, the Enigma is sporty, stylish, easy and ultimately, livable. Mysterious in name, but this scooter has nothing to hide. The Euro 4 spec, fuel injected motor does what it does best, goes. Large 14" inch wheels complete with combined discs front and rear can take on the most battered asphalt with confidence. A bright projector light gets you seen, day or night and a supersized speedometer read out is super functional. USB connectivity, a dropdown mudguard for enhanced weather protection and enough under-seat storage are de rigueur on this model. The Enigma is the perfect tool for any modern day commuter.
